About Me

I live in Gainesville, I'm 49. I've been married for over 26 years and am a mother of two.

I have worked from my home studio for over 16 years as a freelance graphic designer creating projects ranging from school yearbooks, corporate logos, website design, t-shirts, promotional merchandise, billboards, banners and countless other pieces for corporate, small business and not for profit organizations, some of my most rewarding and enthusiastic work.

My favorite part of any project is the very beginning when facing the concept of a design and coming face to face with that new challenges, but seeing the completed piece on display for everyone to see runs a very close second. I actually kind of "fan girl" out when seeing the final piece in use.

I find joy in the little things, love to be artistically challenged, work until the job is done, stand for various charitable causes near and dear to my heart and truly love being an artist and community volunteer. I'm a very good independent creative, but I work well as part of a team and can work in a supervisory capacity as well. I'm always looking to add new skills and find sharing what I've learned a great way to inspire others.

Post-Operative Instructions for Arthroscopy of the Knee

- The affected knee must be kept dry and clean for a period of 72 hours after the surgical procedure. The dressing applied by the doctor must be left on the affected knee for 72 hours; after that period of time, you may remove the dressing and cover the small incisions with dry gauze. After 5 days you may shower getting the affected area wet, then pat it dry and cover the small incisions with a dressing. **If open procedure, do not get incision wet. If you are unsure, please consult with your physician.**
- Limit your activities for the rest of the surgical day, and maintain elevated on pillows or on a chair.
- Apply ice packs to the affected knee 20-30 minutes every hour for surgery, then continue to apply ice if you have any persistent swelling machine, use as much as possible, but at least 20-30 minutes every hour.
- Unless instructed otherwise by the doctor, you are allowed to walk with full weight bearing, without the assistance of crutches or a walker device, you may discontinue the use of crutches or walker when you feel safe, comfortable and with good balance.
- Keep a compressive dressing such as an Ace Bandage on for any persistent swelling. You may reapply the one given to you at surgical time. If you have your own elastic bandage you may use it instead of the Ace Bandage.
- If you notice any signs of infection which includes **redness, increased warmth, pus drainage or swelling from your operative incisions**, you must contact your physician on call as soon as possible at (732) 720-2555. If you have any questions, you should be addressed right away, do not hesitate to contact your physician or address your questions during your first post-operative visit.
- If you are in a brace, remove or unhook it for 15-20 minutes every 4 hours for the first 3 days after surgery. Do not discontinue the brace, unless instructed otherwise by your physician or on call.
- If you do not already have a post-operative appointment, you must schedule one with your physician or on call.
